Summary — A passionate DevOps Engineer who is capable of setting up the digital groundwork (Infrastructure Provisioning), giving your apps a fresh makeover (App Modernization), and making them super portable (Containerization).

Experience

Celebal Technologies Pvt. Ltd.

Jun 2023 – Present

Associate DevOps Engineer, Jaipur, Rajasthan

Client: Sustainability Management Company, Singapore

- Provisioned multi-environment infrastructure (Dev, QA, UAT, Prod) using Terraform, enabling scalable and efficient deployment pipelines
- Implemented CI/CD pipelines using Azure DevOps for automated deployments, code coverage, and container image scanning
- Managed microservices and frontend applications on Kubernetes, leveraging Horizontal Pod Autoscaling (HPA) for high availability
- Enhanced security of Kubernetes clusters using network policies, security contexts, and container hardening practices
- Deployed observability stack (Grafana, Prometheus, Loki) for comprehensive monitoring and logging of Kubernetes resources
- Configured Grafana with Microsoft authentication and set up SMTP alerts for critical events like pod failures and resource usage thresholds
- Secured APIs with Azure API Management policies, enhancing security posture with custom headers and rate limiting
- Implemented Git Flow branching strategy and enforced consistent commit message conventions to streamline version control and collaboration
- Collaborated closely with developers and testers to resolve issues related to application builds, deployments, environment configuration, and performance optimization.
- Developed custom scripts to streamline workflows, including branch validation, commit message conventions, automatic work item updates, and PostgreSQL data migration

Client: Insurance Major Company, India

- Led application modernization by containerizing .NET and Node.js applications
- Designed a custom DNS solution to resolve private AKS, ACR, and KeyVault
- Integrated Azure KeyVault with Azure Kubernetes Service (AKS) for secure secret management
- Deployed observability stack (Grafana, Prometheus, Loki) for Kubernetes resource monitoring and logging
- Implemented security best practices by disabling root access for secure container operations
- Developed a custom script to retrieve updated DLLs from Storage Account for Azure Pipeline builds and gather logs from container insights, storing them in Storage Account

Celebal Technologies Pvt. Ltd.

Feb 2023 – May 2023

Junior Associate DevOps Engineer, Jaipur, Rajasthan

- Worked with Networking and Azure Cloud Services, setting up virtual networks and load balancers
- Gained hands-on experience with Docker and Kubernetes, focusing on deployment and scaling of applications
- Learned Terraform for Infrastructure as Code (IaC), creating reusable and scalable infrastructure
- Implemented CI/CD pipelines using Azure DevOps and Jenkins for automated deployments across environments

Skills

Cloud: Azure

DevOps Tools: Docker, Kubernetes, Openshift, Azure DevOps, Github Actions, Jenkins

Observability: Grafana, Prometheus, Loki, Promtail, Azure Monitor

Provisioning & Configuration tools: Terraform, ARM, Bicep, Helm

Languages: Bash, Powershell, Python, HTML/CSS, JS/TS, SQL

Frameworks/Libraries: Bootstrap, jQuery, ReactJS, AngularJS

Education

Poornima Institute of Engineering and Technology

Bachelor of Technology in Computer Engineering

August 2019 - June 2023

Jaipur, Rajasthan

Kendriya Vidyalaya No. 1

High School

April 2006 - March 2019

Bikaner, Rajasthan
